- DRCOG Traffic Signal Upgrade Project

Impact

- The Adams County Public Works Department protects the health, safety, and welfare of the residents of Adams County through superior engineering, maintenance, operations, and administrative services related to roads and drainage facilities.
- The Operations Division is responsible for routine, programmed, and emergency maintenance of public Right-of-Way (ROW) infrastructure. Services include snow removal, road grading, street sweeping, traffic safety, and other maintenance tasks.
- The Capital Improvement Program Division oversees transportation and drainage projects within the county's ROW. Project phases include engineering design, ROW acquisition, and hiring of contractors to construct roadway projects.
- The Infrastructure Management & Stormwater Division ensures transportation and stormwater infrastructure is constructed and maintained in conformance with county specifications, plans, contract documents, and standards. This division also provides residents with storm sewer drainage services that are high quality, environmentally sensitive, and cost effective.
