

# Air Pollution Control Division

## Notice of a Proposed Project or Activity Warranting Public Comment

Website Title: Rocky Mountain Midstream LLC - Powhaton Compressor Station - Adams County

Notice Period Begins: October 24, 2023

Notice is hereby given that an application for a proposed project or activity has been submitted to the Colorado Air Pollution Control Division for the following source of air pollution:

Applicant: Rocky Mountain Midstream LLC  
Facility: Powhaton Compressor Station  
Natural Gas Compressor Station  
Section 17 of Township 1S, Range 65W  
Adams County

The proposed project or activity is as follows: Rocky Mountain Midstream, LLC has requested permit coverage of the dual product tanks located at this compressor station. These tanks were originally constructed in 2019. After an inspection conducted in 2022 and COC issued by the Division on 3-9-2023, Rocky Mountain has agreed to permit this source as required by regulation and the COC. The stationary source is located in an ozone non-attainment area and it is classified as an existing major stationary source of NO<sub>x</sub> and VOC. Originally, this source was grouped with the addition of ROPE. Due to the COC requirements, operator requested to expedite the processing of the permit for the tanks. This disaggregation is being allowed because ROPE sources are existing sources that are being permitted due to a regulatory change. In other words, ROPE emissions will not configure or contribute to a major modification. Additionally, uncontrolled emissions from this tank are over 40/25 tpy and the operator is requesting a limitation on VOC PTE in order to avoid major stationary source requirements.

The Division has determined that this permitting action is subject to public comment per Colorado Regulation No. 3, Part B, Section III.C due to the following reason(s):

- the source is requesting a federally enforceable limit on the potential to emit in order to avoid other requirements.

The Division has made a preliminary determination of approval of the application.

A copy of the application, the Division's analysis, and a draft of Construction Permit 23AD0412 are available on the Division's website at <https://www.colorado.gov/cdphe/air-permit-public-notice>

The Division hereby solicits submission of public comment from any interested person concerning the ability of the proposed project or activity to comply with the applicable standards and regulations of the Commission. The Division will receive and consider written public comments for thirty calendar days after the date of this Notice. Comments may be submitted using the following options:

- Use the web form at <https://www.colorado.gov/cdphe/air-permit-public-notice>. This page also includes guidance for public participation
- Send an email to [cdphe\\_apcd\\_airpermitcomments@state.co.us](mailto:cdphe_apcd_airpermitcomments@state.co.us)
- Send written comments to our mailing address:
