Re: Wright Farms Metropolitan District - First Amendment to Service Plan

Dear Adams County Planning & Development Division,

The law firm of Erb Law, LLC. represents the Wright Farms Metropolitan District (the "**District**"), a local governmental entity located in unincorporated Adams County, State of Colorado. The District is 100% developed, has no debt, and its Board of Directors is comprised of only District residents.

The District was organized in September of 1985 and operates pursuant to its Service Plan as approved by Adams County, Colorado (the "County"), to provide for the acquisition, construction, completion, and operation of storm sewer facilities and flood and surface drainage facilities and systems within and without the boundaries of the District and to provide for the acquisition, construction, completion, operation, and maintenance of parks and recreational facilities and traffic and safety control devices within and without the boundaries of the District.

The District desires to amend its Service Plan to provide the collection and transportation of solid waste within its boundaries. Currently, residents in the District independently hire their own trash collection service providers to dispose of their solid waste. As a result, trash collection trucks are within the community multiple days per week, which increases noise and truck congestion in the District. The District estimates that individual hiring of trash collection services is approximately five times more expensive than if the District contracted with a single trash collector to provide this service. By having the District contract to provide these services, the residents will enjoy an overall cost savings and reduced days with trash truck noise and traffic.

The District's Service Plan does not give the District the power to provide the collection and transportation of solid waste. Pursuant to Section 32-1-1004(2)(k), C.R.S., metropolitan districts have the power to provide solid waste disposal facilities and collection and transportation of solid waste. In order to provide this service, the District submits its First Amendment to the Service Plan (the "First Amendment") in accordance with Section 32-1-207(2), C.R.S.

The First Amendment amends the District's Service Plan to give the District the power to provide the collection and transportation of solid waste to residents within its boundaries. These additional services are the only proposed change to the Service Plan and the rest of the Service Plan will remain in full force and effect.

There are currently no other governmental entities, including Adams County, located in the immediate vicinity of the District that consider it desirable, feasible, or practical to undertake the collection and transportation of solid waste within the District's boundaries. Accordingly, the District submits its First Amendment to Adams County for approval, which will give the District authority to provide the collection and transportation of solid waste for its residents.

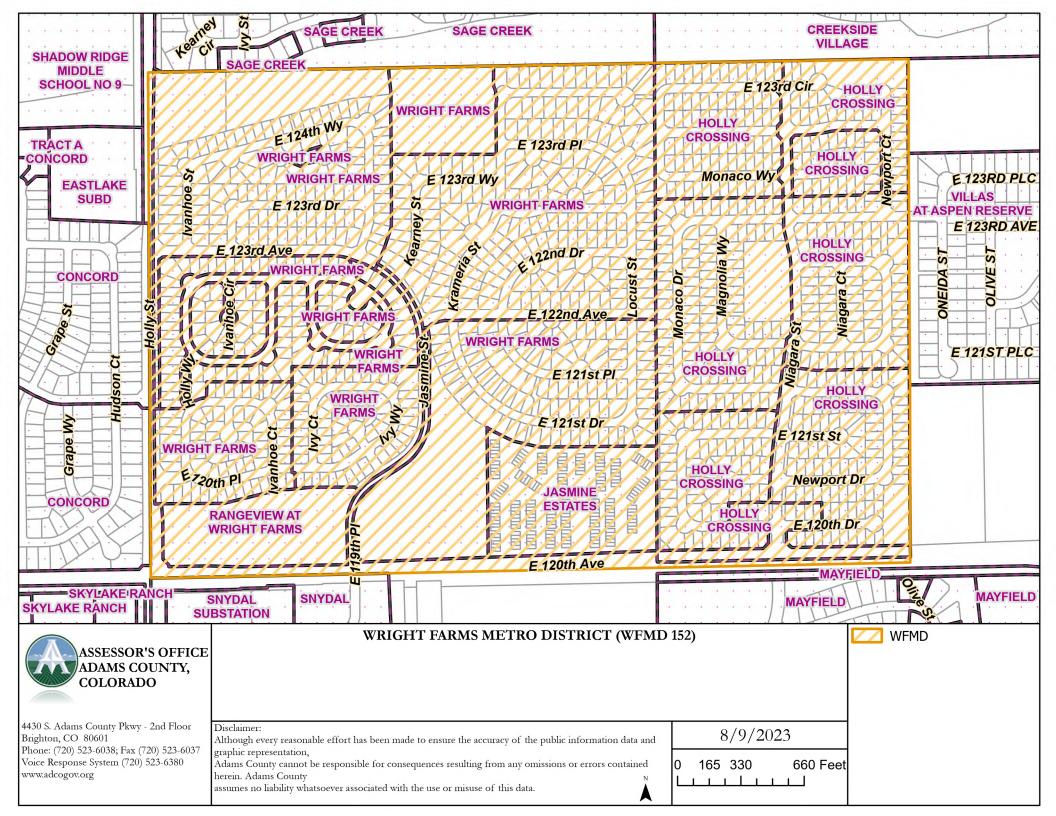

Please feel free to contact me to discuss further or with any questions or concerns.

Sincerely,

ERB LAW, LLC

Glory Schmidt, Esq.

Cc: Jeffrey E. Erb, Esq.

FIRST AMENDMENT TO SERVICE PLAN

FOR

WRIGHT FARMS METROPOLITAN DISTRICT

(Adams County, Colorado)

Approved: [DATE]

Prepared by:

Erb Law, LLC 3900 E. Mexico Ave., Suite 300 Denver, CO 80120

I. PURPOSE AND INTENT

Wright Farms Metropolitan District (the "District") was organized and operates pursuant to its Service Plan as approved by Adams County, Colorado (the "County") in September of 1985, to provide for the acquisition, construction, completion, and operation of storm sewer facilities and flood and surface drainage facilities and systems within and without the boundaries of the District and to provide for the acquisition, construction, completion, operation, and maintenance of parks and recreational facilities and traffic and safety control devices within and without the boundaries of the District.

The District's Board of Directors has determined that it is in the best interests of the District and its residents to provide solid waste collection and transportation for residents within its boundaries. It is the District's intent for this solid waste collection and transportation to be provided by a single contractor. The statutory authority for metropolitan districts to provide such services is set forth in Section 32-1-1004(2)(k), C.R.S.

II. AMENDMENT

1. The Service Plan is amended to add solid waste collection and transportation for residents within the District's boundaries as an additional proposed service in the Service Plan's Description of Proposed Services as follows:

The District may provide solid waste collection and transportation for residents within its boundaries subject to the limitations in § 32-1-1006(6), (7), C.R.S.

2. Except as expressly set forth in this First Amendment all provisions of the Service Plan remain unchanged and in full force and effect.

MODIFIED SERVICE PLAN

MODIFICATION PURPOSE

The purpose of this Modified Service Plan is to expand the boundaries of the Wright Farms Metropolitan District (hereinafter "the District") to include a parcel of property approximately 80 acres in area and to establish the District's authority to provide additional improvements, facilities and services. Although the additional improvements, facilities, and services the District intends to provide to this property are of substantially the same nature as it has been authorized to provide its current land area, it was felt that the size of this parcel, i.e., since it will increase the size of the present District by half, required the modification of the District's Service Plan as it was initially approved. topics not specifically addressed in this Modified Service Plan have been previously discussed in the District's original Service Plan, a copy of which is attached hereto as Exhibit I and incorporated herein by this reference. In accordance with Part 2 of Article 1 of Title 32, Colorado Revised Statutes (the "Control Act"), the following information is set forth in this Modified Service Plan Amendment:

- 1. Information concerning the proposed inclusion of an approximately 80-acre parcel of property into the District, including population estimates and projections of assessed valuation.
- 2. The additional services, facilities, and improvements to be provided and financed, including project descriptions, cost estimates, planning, engineering, legal, and project management services, and the construction standards related thereto.
- 3. A proposed plan of finance including projected development activity, a schedule of assessed valuation, interest rates, the required mill levy, revenues and expenditures, operation/maintenance costs, and total debt service.
- 4. A summary describing the needs and benefits of the District's proposed facilities, and the District's ability to construct and/or acquire said facilities, and to defray the indebtedness.

INTRODUCTION

The District plans to undertake certain improvement projects which, although within its statutory authority, were not included in its original Service Plan. The projects will be located within the expanded boundaries of the District and will be maintained and operated by the District, as required.

GENERAL

It is intended that the District be authorized to undertake the acquisition, construction, completion, installation, operation and maintenance of certain storm sewer, flood and surface drainage facilities, including curbs, gutters, culverts and other drainage facilities; parks and recreational facilities, including paving, grading, landscaping, fencing, easements, and irrigation; and a system of traffic and safety control devices, including lighting and neighborhood identification signage; together with all other necessary, incidental and appurtenant facilities within and without the boundaries of the District.

DEVELOPMENT UPDATE/LAND USE/POPULATION

The District service area has been modified to accommodate the inclusion of an additional 78.852 acres located adjacent to the present west boundary of the District within unincorporated Adams County. The property is not presently served with facilities proposed by the District, nor does the County, any municipality or other special district have any plans to provide such service within a reasonable time and on a comparable basis. The inclusion is described in greater detail in Exhibits II and III attached hereto, and is owned by Centre Realty and Development, Ltd.

The property is currently zoned as a preliminary P.U.D. and has been scheduled for consideration by the Adams County Board of Commissioners as a G.D.P. on October 21, 1985. Present plans call for the construction of 461 single family residential units on the property. At an estimated 3.2 persons per residential unit, this would result in the addition of an estimated 1,476 persons to the District's population. In order to facilitate the development of the property as planned, organized provision of facilities and services proposed to be provided by the District will be necessary.

ASSESSED VALUATION

The present assessed valuation of the property to be included within the District is approximately \$2,840.00. Based upon current land use plans, the projected assessed valuation of the property to be included within the District, together with revised estimates for the District as a whole, are included in the financial section of this Modified Service Plan.

PROPOSED IMPROVEMENTS/ESTIMATED COSTS

In Exhibit C of the original Service Plan, the District projected the total cost of the anticipated parks and recreation improvements, in the form of landscape and irrigation improvements, to be provided by the District at an estimated cost of \$185,083 and projected the District's ability to finance such improvements to be limited to \$149,956. It is now projected that the District will have additional funding available in the amount of \$23,500, for the total amount of \$173,456, for such improvements as set forth in the original Service Plan. Exhibit C shall be revised to reflect the District's increased ability to fund the improvements to the estimated amount of \$173,456. The expenditures for parks and recreation improvements in excess of the bond proceeds issued for such purposes will be funded by the developer. The revised portions of Exhibit C designated "COST SUMMARY" and "PARKS & RECREATION" shall be as follows:

EXHIBIT C

Description of Facilities and Costs*

COST SUMMARY

The total capital facilities costs are estimated as follows and are described in further detail in subsequent pages:

Drainage System - \$ 53,044.00 Safety - \$ -0-Parks & Recreation - \$173,456.00 \$226,500.00

*These estimated amounts include completion, construction, acquisition and/or installation of the proposed facilities, plus contingencies, inflation, design and construction engineering, construction management and other capitalized engineering costs.

PARKS AND RECREATION

The development of the parks and recreation facilities is estimated as follows:

Irrigation System and Landscaping \$173,456
See attached proposal.

The District proposes to provide additional drainage facilities, parks and recreation facilities, and traffic and safety facilities. These facilities will be similar in kind to those described in the original Service Plan attached herewith as Exhibit I. The phasing of new improvements shall be similar to the development plans within the original service area. A general description of such facilities, together with projected cost estimates, is attached as Exhibit IV. Estimated annual costs for the operation and maintenance of the facilities within the District, including the additional facilities to be provided to the 80 acre parcel, is included as Exhibit V, such exhibit to supercede Exhibit E in the original Service Plan.

STANDARDS OF CONSTRUCTION

All improvements subject to dedication shall be constructed in accordance with applicable Adams County and REA standards and specifications and, as appropriate, shall be dedicated to the County or REA upon completion.

FINANCIAL SURVEY

Overview

It is intended that the improvements be financed by the issuance of the District's General Obligation bonds. When issued, these bonds will mature in not more than 20 years from the date of issuance, with the first maturity being not later than three years from their date as required by statute. The proposed maximum interest rate will be 18% and the maximum discount 6%. The exact interest rate and discount will be established at the time the bonds are sold by the proposed District and will reflect market conditions at the time of sale.

Proposed Plan of Finance

In order to allow for the provision of services and facilities to the additional parcel of property as well as the remainder of the District, the District anticipates that it will be necessary to submit a proposal to the District's electors for the authorization of \$1,000,000 of bonds to fund the improvements, rather than a proposal for \$685,000 as was originally envisioned. The amount to be voted exceeds the. amount of bonds to be sold as shown in the attached schedules to allow for unforeseen contingencies and increases in construction costs due to inflation, and to cover all issuance costs, including capitalized interest, reserve funds, discounts, legal fees and other incidental costs of issuance. Based upon construction estimates as computed during the preparation of the Modified Service plan, it is anticipated that a total of \$500,000 of bonds will be issued based

upon 1985 construction costs. The bonds will contain adequate call provisions to allow for prior redemption or refinancing of bonds sold by the proposed District. The amount of bonds sold will be based upon final engineering estimates or actual construction contracts. Organizational costs including legal fees are to be paid from the proceeds of the first bond issuance.

The proposed District will have as a source of revenue a mill levy assessed on all taxable property in the District, which is estimated at 11.26 mills throughout the bond repayment period. This mill levy may vary depending upon the elected board's decision to fund the projects contemplated in the Modified Service Plan. In addition, from the proceeds of the bonds, the District will capitalize interest from the series of bonds to permit payment of interest during the time lapse between development of taxable properties and certification of this development on the tax rolls. Interest income through the reinvestment of construction funds, capitalized interest and annual tax receipts will provide additional income to meet operational expenses.

Cost Summary and Bond Development

The following schedules have been modified such that they now reflect the amounts of bonds to be sold to finance construction costs, including related expenses of the sale of bonds, for the proposed improvements within the District, as enlarged. For the purpose of calculation, and upon the advice of Hanifen, Imhoff inc., interest rates have been assumed to 11% on the projected bond issues.

Projection of Assessed Valuation

For purposes of developing the financial plan, it was assumed that living units and commerical development within the proposed District would be assessed at various percentages depending upon the year of construction. It is also assumed that the assessed valuation will be realized one year after construction and that tax collections will be realized two years after initial construction.

Cash Flow Schedule

The cash flow schedule projects the anticipated flow of funds and is based upon estimates of construction and project needs for bond financing to finance the proposed District's improvements. The cash flow schedule indicates the best estimate of growth within the proposed District and flexibility is given the Board of Directors so that all debt is not incurred prior to a time when the facilities are needed to meet the growing population demands.

CONCLUSION

It is submitted that this Modified Service Plan for the Wright Farms Metropolitan District meets the requirements of the Control Act. It is further submitted that:

- (a) There is sufficient existing and projected need for organized service in the area to be serviced by the proposed District;
- (b) The existing service in the area to be served by the proposed District is inadequate for present and projected needs;
- (c) The proposed District is capable of providing economical and sufficient service to the area within its proposed boundaries;
- (d) The Area to be included in the proposed District does have, and will have, the financial ability to discharge the proposed indebtedness on a reasonable basis;
- (e) Adequate service is not, and will not be, available to the area through the county, or other existing municipal or quasi-municipal corporations, including existing special districts, within a reasonable time and on a comparable basis;
- (f) The facility and service standards of the proposed District are compatible with the facility and service standards of each county within which the proposed special district is to be located and each municipality which is an interested party under section 32-1-204(1), Colorado Revised Statutes;
- (g) The proposal is in substantial compliance with a master plan adopted pursuant to section 30-28-108, Colorado Revised Statutes; and
- (h) The proposal is in compliance with any duly adopted county, regional, or state long-range water quality management plan for the area.
- (i) The creation of the proposed District is in the best interests of the area proposed to be served.

SERVICE PLAN

FOR

WRIGHT FARMS
METROPOLITAN DISTRICT

SERVICE PLAN FOR THE PROPOSED WRIGHT FARMS METROPOLITAN DISTRICT

PURPOSE

Pursuant to the requirements of the Special District Control Act, section 32-1-101, et. seq., Colorado Revised Statutes, this Service Plan consists of a financial analysis and an engineering plan showing how the proposed facilities and services of the proposed District will be provided and financed. The following items are included in this Service Plan:

- 1. A description of the proposed services;
- 2. A financial plan showing how the proposed services are to be financed:
- 3. A preliminary engineering or architectural survey showing how the proposed services are to be provided;
- 4. A map of the proposed special district boundaries and an estimated of the population and valuation for assessment of the proposed special district;
- 5. A general description of the facilities to be constructed and the standards of such construction, including a statement of how the facility and service standards of the proposed special distict are compatible with facility and service standards of any county within which all or any portion of the proposed special district is to be located, and of municipalities and special districts which are interested parties pursuant to section 32-1-204(1), Colorado Revised Statutes;
- 6. A general description of the estimated cost of acquiring land, engineering services, legal services, administrative services, initial proposed indebtedness and estimated proposed maximum interest rates and discounts, and other major expenses related to the organization and initial operation of the district;
- 7. A description of any arrangement or proposed agreement with any political subdivision for the performance of any services between the proposed special district and such other political subdivision and, if the form contract to be used is available, it shall be attached to this Service Plan.

DESCRIPTION OF PROPOSED SERVICES

Upon formation, the proposed District plans to provide for the acquisition, construction, completion and/or operation of storm sewer, flood and surface drainage facilities and systems, including culverts, gutters, curbing, and, if necessary, detention/retention ponds and associated irrigation facilities, and all necessary, incidental and appurtenant facilities, land and easements together with extensions of and improvements to said system within and without the boundaries of the District.

The proposed District also intends to provide for the acquisition, construction, completion, installation and/or operation and maintenance of parks and recreational facilities including, but not limited to, parks, landscaping, open space, cultural activities, community recreational centers, golf courses, water bodies, and other active and passive recreational facilities and programs, and all necessary, incidental and appurtenant facilities, land and easements, together with extensions of and improvements to said facilities within and without the boundaries of the District.

The proposed District also intends to provide for the acquisition, construction, completion, installation and/or operation and maintenance of a system of traffic and safety control devices, including lighting and neighborhood identification signage, on streets and highways and at railroad crossings, together with all necessary, incidental, and appurtenant facilities, land and easements, and all necessary extensions of and improvements to said facilities within and without the boundaries of the District.

PROPOSED DISTRICT BOUNDARIES/MAP

The area to be served by the proposed District is located in Adams County generally north of East 120th Avenue and east of Holly Street. A specific legal description of the land to be included in the proposed District is provided in Exhibit A. A map of the boundaries of the proposed District is attached as Exhibit B. The total area to be included in the proposed District is approximately 159 acres. At some point in the future, the District may consider expanding its boundaries to assist adjoining landowners by the provision of similar services.

PROPOSED LAND USE/POPULATION PROJECTIONS

At present property within the District is zoned as a P.U.D. The property is located in unincorporated Adams County and is not presently served with facilities proposed by the District, nor does the County, any local municipality or special district have any plans to provide such service within a reasonable time and on a comparable basis. It is anticipated

that the property within the District would be utilized to develop retail commercial buildings and single and multi-family residential units. Present planning calls for the construction of approximately 1,246 residential units and 107,000 square feet of retail/commercial space. At an estimated 3.2 persons per residential unit and 1 person per every 250 square feet of retail/commercial space, this would result in a population estimate of 4,415 persons. In order to facilitate the development of the property as planned, organized provision of facilities and services proposed to be provided by the District will be necessary.

ASSESSED VALUATION

The present assessed valuation of the property to be included within the proposed District is approximately \$12,890. The projected assessed valuation of the property to be included within the proposed District, based upon the land use expectations heretofore noted, is included in the financial section of this Service Plan.

PRELIMINARY ENGINEERING/ARCHITECTURAL SURVEY

Facilities to be Constructed and/or Acquired

The District proposes to provide and/or acquire those facilities generally described on page 2 herein. A general description and preliminary engineering survey of the facilities to be constructed and/or acquired are shown on Exhibit C.

Standards of Construction/Statement of Compatibility

All safety protection facilities to be dedicated to the County will be constructed in accordance with the standards and specifications of Adams County and the Colorado Department of Highways, as appropriate. All other such facilities will be constructed in accordance with engineering and design requirements appropriate for the surrounding terrain, which shall not be incompatible with standards of Adams County, or other local public entities.

All storm sewers, flood and surface drainage facilities will be constructed in accordance with the standards and specifications the Colorado Department of Highways, Adams County and other local jurisdictions, as appropriate.

Based on an analysis of jurisdictions who are interested parties in the Service Plan proceedings according to the Colorado statutes, the proposed District's Engineers have determined that the standards by which the facilities are to be constructed are compatible with the facilities of such other jurisdictions, a list of which is attached as Exhibit "D".

Estimated Costs of Facilities

The estimated costs of the facilities or assets to be constructed, installed and/or acquired by the proposed District are set forth in Exhibit C attached hereto. Engineering costs have been included therein. The phasing of these improvements will be consistent with the development plans within the proposed District. In the event available funds exceed the costs of the improvements in a specific area within the proposed District, these excess funds will be used to provide improvements of a similar nature in another part of the District.

Operation and Maintenance/Estimated Costs

The proposed District intends to dedicate all appropriate improvements and related facilities to the County for operations and maintenance. All other facilities will be owned and/or, operated and maintained by the District. Estimated annual costs for operation and maintenance functions are attached as Exhibit E. The District intends to maintain not only those improvements installed by the District but also selected improvements provided by the developer.

FINANCIAL PLAN

The following is a detailed financial plan showing how the proposed facilities and/or services are to be financed, including the estimated costs of acquiring land, engineering services, legal services, administrative services, initial proposed indebtedness and estimated proposed maximum interest rates and discounts, and other major expenses related to the organization and initial operation of the District. The financial feasibility plan demonstrates that, at the projected level of development, the proposed District has the ability to finance the facilities identified herein, and will be capable of discharging the proposed indebtedness on a reasonable basis.

WRIGHT FARMS METROPOLITAN DISTRICT

FINANCIAL CONSIDERATIONS

GENERAL

After consultation with the engineers, and upon advice of Hanifen, Imhoff Inc., investment bankers to the proposed District, it has been decided that the improvements to be constructed by the proposed District will be financed by the issuance of general obligation bonds to be authorized and issued in accordance with the authorizing act approved by the Colorado Legislature. The bonds, when issued, will mature in not more than 20 years from date of issuance with the first maturity being not later than three years from their date as required by statute. The proposed maximum interest rate will be 18% and the maximum discount 6%. The exact interest, rates and discounts will be established at the time the bonds are sold by the proposed District and will reflect market conditions at the time of sale.

It is proposed that a total of \$685,000 of bonds for various purposes will be submitted to the electors of the proposed District for approval to fund the improvements. The amount to be voted exceeds the amount of bonds to be sold as shown in the attached schedules to allow for unforeseen contingencies and increases in construction costs not contemplated in this Service Based upon construction estimates as computed during the preparation of the Service Plan, it is anticipated that a total of \$290,000 of bonds will be issued based upon 1985 construction costs. The bonds will contain adequate call provisions to allow the prior redemption or refinancing of bonds sold by the proposed District. The amount of bonds sold will be based upon final engineering estimates or actual construction contracts. Organizational costs including legal fees are to be paid from the proceeds of the bond issuance.

The proposed District will have as a source of revenue a mill levy assessed on all taxable property in the District, which is estimated at 11.26 mills throughout the bond repayment period. This mill levy may vary depending upon the elected board's decision to fund the projects contemplated in the Service Plan. In addition, from the proceeds of the bonds, the proposed District will capitalize interest from the series of bonds to permit payment of interest during the time lapse between development of taxable properties and certification of this development on the tax rolls. Interest income through the reinvestment of construction funds, capitalized interest and annual tax receipts will provide additional income to meet operational expenses.

Cost Summary and Bond Development

The following schedules reflect the amount of bonds to be sold to finance construction costs, including related expenses of the sale of bonds. For the purpose of calculation, and upon advice of Hanifen, Imhoff Inc., interest rates have been assumed to be 11% on the projected bond issues.

Projection of Assessed Valuation

For purposes of developing the financial plan, it was assumed that living units and commercial development within the proposed District would be assessed at various percentages depending upon the year of construction. It is also assumed that the assessed valuation will be realized one year after construction and that tax collections will be realized two years after initial construction.

Cash Flow Schedule

The cash flow schedule projects the anticipated flow of funds and is based upon estimates of construction and project needs for bond financing to finance the proposed District's improvements. The cash flow schedule indicates the best estimate of growth within the proposed District and flexibility is given the Board of Directors so that all debt is not incurred prior to a time when the facilities are needed to meet the growing population demands.

CONCLUSION

It is submitted that this Service Plan for the proposed Wright Farms Metropolitan District establishes that:

- (a) There is sufficient existing and projected need for organized service in the area to be serviced by the proposed District;
- (b) The existing service in the area to be served by the proposed District is inadequate for present and projected needs;
- (c) The proposed District is capable of providing economical and sufficient service to the area within its proposed boundaries;
- (d) The area to be included in the proposed District does have, and will have, the financial ability to discharge the proposed indebtedness on a reasonable basis;
- (e) Adequate service is not, and will not be, available to the area through the county, or other existing municipal or quasi-municipal corporations, including existing special districts, within a reasonable time and on a comparable basis;
- (f) The facility and service standards of the proposed District are compatible with the facility and service standards of each county within which the proposed special district is to be located and each municipality which is an interested party under section 32-1-204(1), Colorado Revised Statutes;
- (g) The proposal is in substantial compliance with a master plan adopted pursuant to section 30-28-108, Colorado Revised Statutes; and
- (h) The proposal is in compliance with any duly adopted county, regional, or state long-range water quality management plan for the area.
- (i) The creation of the proposed District is in the best interests of the area proposed to be served.

Exhibit A

Legal description of the Proposed District

The Southwest one-quarter of Section 32 Township 1 South, Range 67 west of the 6th Principal Meridian, Adams County, Colorado. Containing 159.778 acres more or less, including the road rights of way.

EXHIBIT B

Map

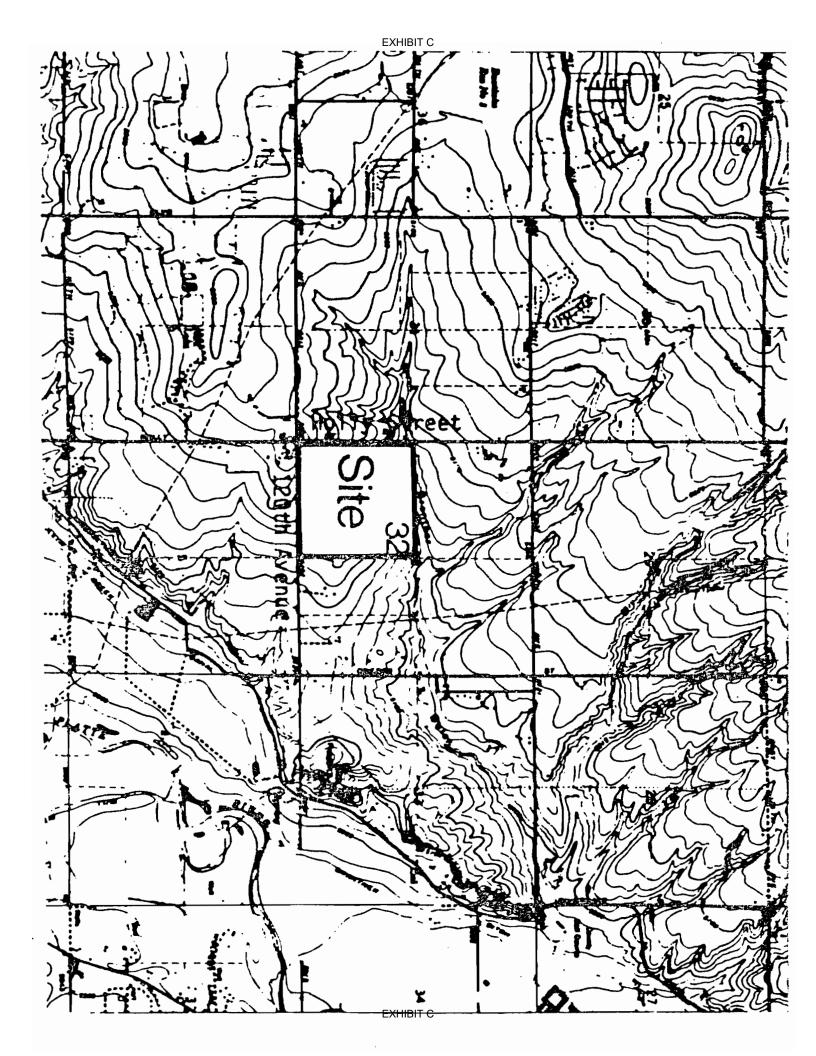

EXHIBIT C

Description of Facilities and Costs*

COST SUMMARY

The total capital facilities costs are estimated as follows and are described in further detail in subsequent pages:

Drainage System - \$53,044.00 Safety - \$ -0-Parks & Recreation - \$149,956.00 \$203,000.00

*These estimated amounts include completion, construction, acquisition and/or installation of the proposed facilities, plus contingencies, inflation, design and construction engineering, construction management and other capitalized engineering costs.

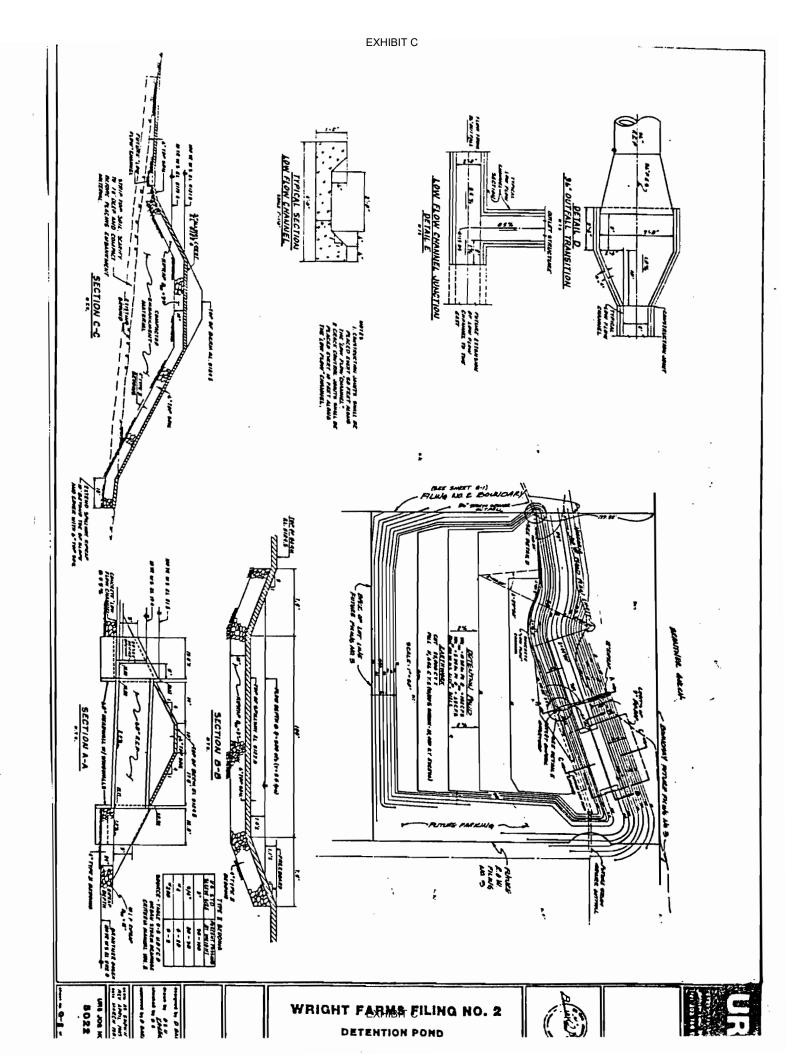

EXHIBIT C

DRAINAGE SYSTEM

The capital costs for drainage facilities are projected as follows:

<u>Quantities</u>	Item Description	<u>Unit</u>	Cost
2 ea	60" Headwall/wing & Riprap	6,000.00	12,000.00
350'	Concrete Low Flow Channel	10.00	3,500.00
415 cyds	9" Riprap	60.00	24,900.00
23 cyds	12* Riprap	60.00	1,380.00
140 cyds	Bury Riprap	35.0,0	4,900.00
42'	60" RCP CL-3	102.85	4,319.70
l ea	Outfall Pan	250.00	250.00
	,	Subtotal	51,249.70
	L.D.B. Construction Managemen	nt	1,794.30
			53,044.00

Drainage System Map and Cross Sections

SAFETY SYSTEM

The capital costs for safety improvements are projected as follows:

The safety improvements consist of the street lights within the district which are to be installed by the developer at no cost to the District. The developer intends to convey the improvements to the District which, in turn, will then convey them to the REA. The District will, however, remain responsible for applicable maintenance costs and electricity.

PARKS & RECREATION

The development of the parks and recreation facilities is estimated as follows:

Irrigation System and Landscaping \$149,956.00

See attached proposal.

November 29, 1984

Mr. Jim Dickerson First Capitol Corporation 3300 South Parker Road Littleton, Colorado 80222

Dear Mr. Dickerson:

Thank you for allowing us to present a proposal for the irrigation system and landscape work, at the Wright Farm project.

IRRIGATION:

Listed below are the materials we intend to use for the irrigation system:

567	1804 Plastic Hi Pops
41	l¼" Hydrorain Valve (EP-150-S)
3	Irritrol MC-18 Automatic Controller (includes ped. & concrete pad)
49,300	L.F. #141 L.F. Wire
962	Emitters for Drip
2,100	L.F. 5mm Drip Line
5,180	L.F. 13mm Drip Line
6	Drip Valve Assembly
10,000	L.F. 1" 80# Poly (Laterals)
300	L.F. 2" 80# Poly (Laterals)
5,700	L.F. 2" CL160 PVC (Mainline)
180	L.F. 2" CL160 PVC (Sleeves)
440	L.F. 4" CL160 PVC (Sleeves)
1	الحِ" Stop & Waste
1	2" Febco 805 Y
24	Drain Valve Assembly

Our irrigation proposal is based on irrigation design and specifications by The Yerkey Co.

Our irrigation proposal includes all material, taxes, labor and equipment necessary for a complete irrigation system. Also included are required service taps and backflow preventers, all necessary sleeving prior to pavement installation, all required boring operations, and a complete one year guarantee including all materials and workmanship.

Our irrigation proposal does not include 110 volt electrical service and tie-in to controller(s) location.

Yerkey. The people who turn everything green.

EXHIBIT E Operations and Maintenance Cost Estimates

The District will be responsible for the maintenance and operation of the off-street drainage system and the parks/recreation facilities. The County is expected to maintain the streets.

The estimated yearly maintenance costs are as follows: Landscaped areas along streets (Jasmine, 123rd, 120th, Holly) 120, 6800 & at 16¢ 19,300 5 Acre Blue Grass Park 217, 800° & at $7 \not\in$ 15,250 8 Acre Natural Park 348, 480° & at 1¢3,500 Tennis Court Maintenance 500 Part Time Manager 10 hrs/wk at \$26.00 13,500 750 Capitol Improvement Allowance Audit (over \$50,000 budget) 2,500 County Tax Collection (3% of Rev.) 1,800 Bonds & Insurance 3,000 600 Electricity Trash Removal 1,000 Directors Fees (5x50x6) 1,500 1,500 Legal (250x6) Postage & Supplies 200 Miscellaneous 300 65,200

ADDENDUM TO THE WRIGHT FARMS SERVICE PLAN

AUGUST 1, 1985

The Wright Farms Service Plan submitted June 26, 1985, to the County of Adams, Colorado, is hereby amended by this Addendum as follows:

1. The paragraph under the Section titled "Operation and Maintenance/Estimated Costs" on page 4 of the Service Plan is to be deleted in its entirely and replaced by the following paragraph:

"The proposed District intends to dedicate street improvements and related facilities to the County for operations and maintenance. Landscaping along streets dedicated to the County, however, will be maintained by the proposed District. All other facilities will be owned and/or operated and maintained by the District, including the 5 Acre Blue Grass Park and the 8 Acre Natural Park. Estimated annual costs for operation and maintenance functions are attached as Exhibit E. The District intends to maintain not only those improvements installed and retained by the District but also selected improvements provided by the developer. These improvements include, but are not limited to the safety system and entry way lights."

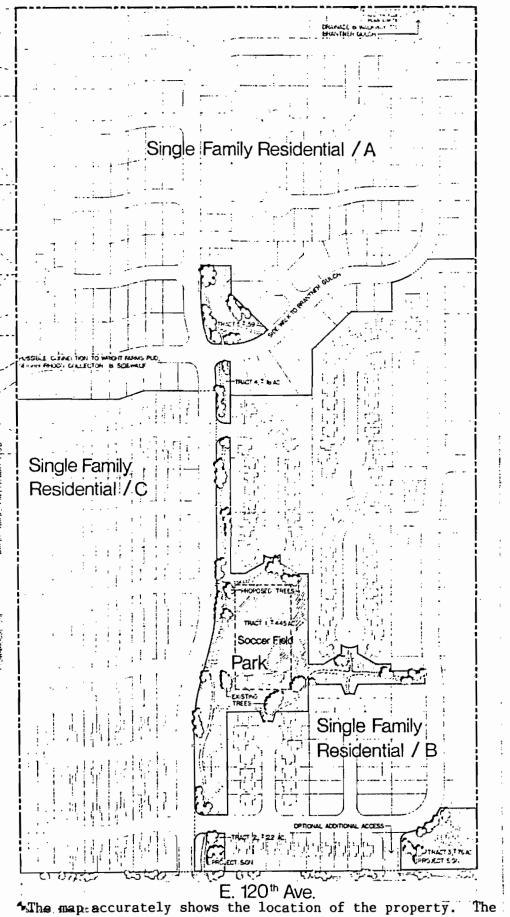

- 2. The Section titled "DRAINAGE SYSTEM" of EXHIBIT C is to be amended by the insertion of an "*" after the total amount shown as \$53,044.00 and the addition of the following paragraph:
- "* The amount set forth above is an estimate of the proposed District's allocable share of the total costs of these improvements, the balance of which expenses are to be paid by the Developer."
- 3. The Section titled "PARKS & RECREATION" of EXHIBIT C is to be amended by the deletion of the first two lines of text which read "The development of the parks and recreation facilities are estimated as follows:" and their replacement by the following:

*The completed development of the parks and recreation facilities is anticipated to take three years, or less, from

the date bond proceeds are received. The estimated costs of these improvements are as follows:

- 4. EXHIBIT E is to be amended by the addition of the phrase "(including maintenance of onsite drainage facilities)" after the phrase "5 Acre Blue Grass Park;" the deletion of the term "Electricity" and its replacement by the term "Safety System Maintenance;" the deletion of the term "Trash Removal" and its replacement by the term "Park Trash Removal;" and the insertion of an "*" after the term "Part Time Manager" and the addition of the following paragraph at the bottom of the page:
- "* The Part Time Manager's responsibilities will include, but not be limited to, the oversight of the maintenance and operation of the parks and landscaping, as well as general district affairs."

estern boundary ontiguous with urrent District oundaries.

*The map accurately shows the location of the property. The zoning, however, is subject to change, pending county approval.

The West 1/2 of the Southeast 1/4 of Section 32, except the South 30.00', T.1S., R.67W. of the 6th P.M. Adams County, Colorado, described as follows: beginning at the Southwest corner of the Southeast 1/4 of said Section 32, thence NOOO02'50"E, on an assumed bearing, along the West line of the West 1/2, Southeast 1/4 of said Section 32, a distance of 30.00' to the true point of beginning; thence NOOO02'50"E continuing along said West line, a distance of 2602.00' to the Northwest corner of said West 1/2, Southeast 1/4; thence N89018'07"E along the North line of said West 1/2, Southeast 1/4, a distance of 1320.83' to the Northeast corner of said West 1/2, Southeast 1/4; thence S00002'31"W along the east line of said West 1/2, Southeast 1/4, a distance of 2598.94' to a point 30.00' North of the South line of said West 1/2, Southeast 1/4; thence S89010'12"W along a line parallel with and 30.00' North of said South line of the West 1/2, Southeast 1/4, a distance of 1321.11' to the true point of beginning. Contains 78.852 acres more or less.

EXHIBIT IV

DRAINAGE SYSTEM

The capital costs for the drainage facilities are projected as follows:

Storm Sewer	\$ 48,500
Culvert	3,000
Open Space Detention Pond Structures	4,000
TOTAL FOR DRAINAGE SYSTEM	\$ 55,500

PARKS AND RECREATION

The development of the park areas are estimated as follows:

<pre>Irrigation System/53,600 sq.ft. @ \$.37 per sq.ft.</pre>	\$ 20,000
Fencing/3,060 lineal ft. @ \$6.54 per lineal ft.	20,000
Irrigation Tap/1-1/2 inch	28,000
TOTAL FOR PARKS AND RECREATION	\$ 68,000
GRAND TOTAL	\$123,500

EXHIBIT V

Operations and Maintenance Cost Estimates

*The estimated yearly maintenance costs are as follows:

Landscaping on street frontages - (Jasmine, Newport, 123rd, 120th and Holly)/179,305 sq.ft. @ \$.16 per sq.ft.	\$ 28,690
Blue Grass for 5 acre park/217,800 sq.ft. @ \$.07 per sq.ft.	15,250
Blue Grass for 2.38 acre park/103,673 sq.ft. @ \$.07 per sq.ft.	7,260
Natural Grass for 8 acre park/348,480 sq.ft. @ \$.01 per sq.ft.	3,500
Detention Pond maintenance/111,950 sq.ft. @ \$.01 per sq.ft.	1,120
Tennis Court maintenance	500
Part-time Manager/10 hours per week @ \$26.00 per hour	13,500
Capitol Improvement Allowance	1,000
Audit (required on Budgets over \$50,000)	3,000
County Tax Collection (3% of Revenue)	1,800
Bonds and Insurance	3,000
Electricity	1,000
Trash Removal	1,000
Directors Fees/5 Directors @ \$50 each for 6 meetings	1,500
Legal Expenses/6 meetings @ \$250 per hour	1,500
Postage and Supplies	300
Miscellaneous	300
TOTAL ESTIMATED YEARLY MAINTENANCE COSTS	\$ 84,220

*The District will be responsible for the operation and maintenance of the on-site drainage system and the parks and recreation facilities to the extent funding is available for the provision of such services to the 80 acre parcel. It is estimated that \$6,050 will be available for such services to the parcel and that Centre Realty and Development, Ltd., their heirs, assigns, and transferees, and First Capitol Corporation, their heirs, assigns, and transferees shall be responsible for all operation and maintenance costs to the 80 acre parcel in excess of the estimated \$6,050 amount in equal shares.

Re: Wright Farms Metropolitan District

First Amendment to Service Plan – Financial Narrative

Dear Adams County Planning & Development Division,

The law firm of Erb Law, LLC. represents the Wright Farms Metropolitan District (the "**District**"), a special district located in unincorporated Adams County, State of Colorado. This financial narrative is provided as a supplement to Service Plan Amendment application in lieu of the financial plan. The provision of trash services by the District does not necessitate a formal financial plan because:

1. The proposed Service Plan Amendment does not change the Service Plan's financial information or plan.

The District's proposed Service Plan Amendment only amends the original Service Plan to give the District authority to provide solid waste collection and transportation to District residents. The Service Plan Amendment does not amend the Service Plan's financial plan, nor necessitates the need for a supplemental financial plan.

2. <u>The District does not need external financing to support the proposed Service Plan</u> Amendment.

The District possesses the financial capacity to sustain the proposed trash services without external financing. This is attributed to a sustainable mill levy, a robust general fund reserve that would adequately cover operational costs associated with trash services, and the option to implement a fee-based system to offset these expenses as permitted by §§ 32-1-1004(2)(k) and 32-1-1006(6), C.R.S.

When the District was organized, public improvements were financed by the issuance of General Obligation bonds. In 2002, the District paid off these bonds and will not incur any further debt to provide the proposed trash services.

3. There is a sustainable source of revenue that supports the proposed Service Plan Amendment.

The District's primary source of revenue to support the provision of trash services is property tax revenues. The approved 2024 budget is attached, which includes anticipated expenditures for approximately 6 months of trash service. *See 2024 Budget*.

In addition to property tax revenue, the District can adopt a fee to pay for the provision of trash services. Similar metropolitan districts, with comparable demographics, charge their residents approximately \$14.50/home per month for trash services. However, the District does not intend to impose a fee for trash service and intends to pay for trash services using property tax revenue.

4. <u>Provision of trash services by the District will result in a net savings to the District's residents.</u>

District residents currently independently engage trash providers at an average cost of approximately \$60/monthly. The District anticipates that it will be able to provide trash service for approximately \$14.50/month per home, for an average cost savings of approximately \$45.50 per month, per home.

Per month, the estimated cost for providing these trash services is \$14,405, totaling \$172,860 annually. With a general fund reserve totaling more than \$2 million and the option to impose fees for trash services, the District is financially-equipped to manage the costs associated with this essential service.

Please feel free to contact me to discuss further or with any questions or concerns.

Sincerely,

ERB LAW, LLC

Glory Schmidt, Esq.

Cc: Jeffrey E. Erb, Esq.

Re: Wright Farms Metropolitan District

First Amendment to Service Plan – Traffic Impact Letter

Dear Adams County Planning & Development Division,

The law firm of Erb Law, LLC. represents the Wright Farms Metropolitan District (the "**District**"), a special district located in unincorporated Adams County, State of Colorado. Erb Law lacks expertise in traffic matters. The numerical figures presented in this letter are approximate, derived from research and interactions with various waste services providers. This traffic letter is provided in support of the Wright Farms Service Plan Amendment.

Introduction

The District desires to amend its Service Plan to provide collection and transportation of trash and recycling for District residents. Currently, District residents independently hire trash collection service providers to dispose of their trash and recycling. As a result, trash and recycling trucks are within the District multiple days each week, increasing noise and truck congestion in the District.

If the proposed Service Plan Amendment is approved, the District will contract with a single trash and recycling services provider to provide trash and recyclable material collection and transportation to District residents. This service is estimated to require two trash trucks one day each week to collect and transport solid waste and two recycling trucks one day every other week to collect and transport recyclable material. These services will be provided to approximately 1,400 single-family properties within the District. This traffic impact letter outlines the traffic impact of the District providing trash services to its residents in accordance with its proposed Service Plan Amendment.

Objective

This traffic impact letter will provide information regarding the impact associated with the District's provision of trash collection and transportation services on:

- 1. Street wear and maintenance;
- 2. Air quality;
- 3. Noise; and
- 4. Neighborhood aesthetics.

Page 1 of 4

Analysis¹

- 1. Street Wear and Maintenance.
 - a. Existing Conditions.

Trash trucks are typically the heaviest vehicles regularly operating on residential streets, with an average weight of 51,000 pounds. Currently, approximately five trash trucks come to the District each week to collect and transport trash and recycling outside the District. This equates to 255,000 pounds of trash trucks operating within the District each week. This weight has a significant impact on street wear and related maintenance in the District and throughout the State of Colorado.

b. Conditions if Service Plan Amendment is Approved.

The number of days with trash trucks within the District would reduce from five days each week to two days each week, consequently reducing the weight of operating trash trucks within the District from 255,000 pounds/weekly to 102,000 pounds/weekly, decreasing street wear and maintenance.

- 2. Air Quality/Vehicle Emissions.
 - a. Existing Conditions.

Currently, five trash trucks operate within the District and transport the trash and recycling they collect to different landfills within the State of Colorado. Using the Carbon Emission Calculation, these five trash trucks operating in the District generate as much as 0.5 metric tons of CO₂/week².

b. Conditions if Service Plan Amendment is Approved.

By reducing the number of trash trucks in the community from five per week to two per week, CO₂ emissions would be reduced from 0.5 metric tons of CO₂/week to 0.2 metric tons of CO₂/week.

- 3. Neighborhood Aesthetics.
 - a. Existing Conditions.

¹ Information regarding current trash and recycle traffic provided from discussions with District residents. Information regarding anticipated trash and recycle traffic obtained from discussions with a potential trash and recycle service provider.

² The Carbon Emission Calculation is the equation the Environmental Protection Agency uses to calculate greenhouse gas emissions.

Presently, five trash trucks operate within the District on different days, each using different trash bins. Therefore, trash bins are on the street every day within the District.

b. Conditions if Service Plan Amendment is Approved.

Using a single trash service provider will allow for improved aesthetics via standardized trash containers and a reduction in the number of days on which trash containers are on the street pending or following trash pickup.

4. Noise.

a. Existing Conditions.

The average noise of a trash truck collecting and transporting trash ranges from 85-100 decibels. Therefore, District residents are experiencing noise levels of 85-100 decibels for at least two hours every day each week, for a total of ten hours.

b. Conditions if Service Plan Amendment is Approved.

On average, if two trash trucks and two recycling trucks handle trash collection and transportation within the District two days per week as projected, District residents will encounter 100 decibels of noise for approximately 4 hours a week, an overall reduction of 6 hours.

5. Safety.

a. Existing Conditions.

Five trash trucks operating within a residential neighborhood every day during the week produces a substantial safety concern for District residents, both pedestrians and for local traffic.

b. Conditions if Service Plan Amendment is Approved.

Reduced number of hours and days on which trash truck operate withing the District will reduce the risk of accidents caused by truck traffic to both local traffic and pedestrians within the community.

Trip Generation Summarization.

	Number of Trips/Week/Month	Time and Length of Trips
If the District	Two trash trucks per week	Trash trucks are expected to provide
Exclusively Provides	on a single day.	services for approximately four hours
Trash Services Per		per week.

the Proposed Service Plan Amendment	Two recycling trucks everyother-week on a single day.	Recycling trucks are expected to provide services for approximately four-hours, every other week.
Current residential trash collection system	One trash truck per day, five days a week Five recycling trucks per day, five days a week.	Trash and recycling services last approximately two hours per service.

Conclusion

In light of the findings presented in this traffic impact letter, the proposed Service Plan Amendment, if approved, will lead to a notable reduction in street wear and maintenance, carbon emissions, and noise, and enhance neighborhood aesthetics and general safety resulting in a net benefit for District residents.

Please feel free to contact me to discuss further or with any questions or concerns.

Sincerely,

ERB LAW, LLC

Glory Schmidt, Esq.

WRIGHT FARMS METROPOLITAN DISTRICT 2024 BUDGET SUMMARY OF SIGNIFICANT ASSUMPTIONS

Services Provided

The District was organized by court order dated January 3, 1986 to provide parks and recreational facilities, flood and surface drainage facilities, storm sewer facilities, and safety protection in two subdivisions in Adams County. The District constructed these facilities and provides continuing maintenance, landscaping, and fencing.

On May 3, 1994, the voters within the District authorized an increase in property taxes generated from an operations and maintenance mill levy of up to \$100,000 annually. The \$100,000 annual increase is considered to be in addition to any limitations, provided that the operations and maintenance mill levy does not exceed 23 mills. On November 6, 2012, the voters within the District authorized the District to collect, retain, and spend any and all amounts received annually as grant revenue without regard to any spending limitation contained within Article X, Section 20 of the Colorado Constitution.

The District has no employees and all administrative functions are contracted.

The District prepares its budget on the modified accrual basis of accounting, in accordance with the requirements of Colorado Revised Statutes C.R.S. 29-1-105 using its best estimates as of the date of the budget hearing. These estimates are based on expected conditions and its expected course of actions. The assumptions disclosed herein are those that the District believes are significant to the budget. There will usually be differences between the budget and actual results, because events and circumstances frequently do not occur as expected, and those differences may be material.

Revenues

Property Taxes

Property taxes are levied by the District's Board of Directors. The levy is based on assessed valuations determined by the County Assessor generally as of January 1 of each year. The levy is normally set by December 15 by certification to the County Commissioners to put the tax lien on the individual properties as of January 1 of the following year. The County Treasurer collects the determined taxes during the ensuing calendar year. The taxes are payable by April or, if in equal installments, at the taxpayer's election, in February and June. Delinquent taxpayers are notified in August and generally sales of the tax liens on delinquent properties are held in November or December. The County Treasurer remits the taxes collected monthly to the District.

The calculation of the taxes levied is displayed on the Property Tax Summary page of the budget using the mill levy adopted by the District.

Senate Bill 21-293 among other things, designates multi-family residential real property (defined generally, as property that is a multi-structure of four or more units) as a new subclass of residential real property. For tax collection year 2024, the assessment rate for single family residential property decreases to 6.765% from 6.95%. The rate for multifamily residential property, the newly created subclass, decreases to 6.765% from 6.80%. Agricultural and renewable energy production property remains at 26.4%. Producing oil and gas remains at 87.5%. All other nonresidential property decreases to 27.90% from 29%.

WRIGHT FARMS METROPOLITAN DISTRICT 2024 BUDGET SUMMARY OF SIGNIFICANT ASSUMPTIONS

Revenues – (Continued)

Specific Ownership Taxes

Specific ownership taxes are set by the State and collected by the County Treasurer, primarily on vehicle licensing within the County as a whole. The specific ownership taxes are allocated by the County Treasurer to all taxing entities within the County. The budget assumes that the District's share will be equal to approximately 7.0% of the property taxes collected by the General Fund.

Conservation Trust (Lottery Proceeds)

The District receives revenue from the State Lottery on a per capita basis ratio. The revenue is restricted for recreation purposes under State statutes.

Net Investment Income

Interest earned on the District's available funds has been estimated based on an average interest rate of approximately 4.0%.

Expenditures

Administrative Expenses

Administrative expenditures include the estimated services necessary to maintain the District's administrative viability such as legal, accounting, insurance, banking, meeting expense and other administrative expenses. Administrative expenses have been assumed to be at essentially the same level of required services as the prior year.

Maintenance and Operations

Maintenance and operations have been estimated by the District's Board of Directors and consultants based on the results of prior years and anticipated future needs of the District.

Capital Improvements

The District has budgeted for miscellaneous capital expenditures as detailed on page 3 of the budget.

WRIGHT FARMS METROPOLITAN DISTRICT 2024 BUDGET SUMMARY OF SIGNIFICANT ASSUMPTIONS

Reserve Funds

General Reserves

The District has provided a reserve fund for future contingencies, including operations. The District has also set aside funds to be used for the future replacement of such capital items as fencing, landscaping, irrigation, and park facilities. A formal replacement reserve study has not been undertaken, and therefore, amounts accumulated may not be adequate to meet future needs.

Emergency Reserve

The District has provided for an emergency reserve equal to at least 3% of fiscal year spending for 2024, as defined under TABOR.

Debt and Leases

The District has no outstanding debt, nor does it have any capital or operating leases.

This information is an integral part of the accompanying budget.
